

KAMAL U G

Software Engineer • Spring Boot | React.js | Full-Stack Developer
kamalug17@gmail.com | +91-9496434061 | Trivandrum, Kerala | linkedin.com/in/kamal-u-g

PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building enterprise-grade full-stack applications using Spring Boot and React.js. Proficient in dependency injection (Spring IoC/DI), transaction management, AOP, RESTful API development, microservices, TDD (JUnit), and DevOps/CI-CD workflows.

TECHNICAL SKILLS

Languages: Java • JavaScript • Python • SQL

Backend: Spring Boot • Spring IoC/DI • AOP • RESTful APIs • Microservices • Node.js

Frontend: React.js • HTML5 • CSS3 • Responsive Web Design

Databases: MySQL • PostgreSQL • Data Access Frameworks • Query Optimisation

Practices: TDD • JUnit • Agile/Scrum • CI/CD • DevOps • OOP • SDLC • Code Review

Tools: Git • GitHub • Maven • Postman • VS Code

PROFESSIONAL EXPERIENCE

Graduate Apprentice Trainee — Software Engineer

Mar 2025 – Mar 2026

APJ Abdul Kalam Technological University, Trivandrum

- Engineered full-stack features for production e-Governance applications using Spring Boot and React.js, applying dependency injection (IoC/DI), transaction management, and AOP for enterprise-grade separation of concerns.
- Designed 10+ RESTful API endpoints with JWT authentication, DTO mapping, and structured error handling; authored JUnit test suites following TDD practices, reducing post-release defects.
- Resolved critical production bugs in Spring Boot microservices; collaborated in Agile/Scrum sprints within a DevOps/CI-CD workflow to ensure release-ready, well-tested code.

Web Developer Intern

Sep 2024 – Oct 2024

Orinson Technologies Private Limited

- Built responsive UI (React.js) and RESTful backend endpoints for a client-facing enterprise web application, contributing to a production release within a 2-month engagement.
- Optimised MySQL queries using data access best practices; resolved 15+ cross-stack defects through structured debugging and code review with senior engineers.

PROJECTS

Issue & Ticket Management System

2025 – 2026

Java • Spring Boot • React.js • MySQL • JWT • Spring Security

- Architected a full-stack enterprise ticket system with RBAC (Admin, Internal, External roles), integrating Spring IoC/DI, AOP-based cross-cutting concerns, and transaction management to ensure data consistency across operations.
- Implemented secure JWT authentication and Spring Security session management; designed RESTful APIs with DTO pattern, server-side pagination, and comprehensive input validation for maintainable enterprise data contracts.
- Applied test-driven development with JUnit for service-layer unit tests; used Git branching and Maven build lifecycle within a CI/CD-aware DevOps workflow for iterative, release-ready delivery.

Blockchain Document Verification — Flood-Guard

2023 – 2024

React.js • Node.js • PostgreSQL • Blockchain

- Led full-cycle development of a decentralised enterprise document verification platform integrating blockchain-based tamper-proof storage with a Node.js backend and PostgreSQL data access layer for persistent audit records.
- Implemented on-chain cryptographic integrity checks and audit trails to verify government document authenticity without a central authority; applied functional programming principles in the backend processing pipeline.
- Designed a React.js frontend with RESTful API integration for document upload, real-time verification status, and role-based access — delivering a complete end-to-end enterprise system.

EDUCATION

B.Tech — Computer Science & Engineering

2020 – 2024

Mohandas College of Engineering & Technology, Kerala | CGPA: 7.78/10
